

# Header MiniMAX

## Set up Instructions

**First:** Lay all tubes and sections (SEC) in numerical order. Connect tubes 2 thru 5 to SEC 1 as the drawing illustrates.

**Second:** Place SEC 6 on top of tubes 2 thru 5 and engage the push button connectors. Continue with the rest of the tubes and sections as the drawing illustrates.

**Third:** Attach the Hi-Ref to the unit. Then hang the lights. Plug in lights and adjust if necessary.

**Fourth:** Attach the graphics to the unit.

**Fifth:** Attach panels to the unit.

**Rounded End Cap Panels Do Not attach to the front of the exhibit system, they are designed to attach to the sides only!**

**First:** Starting at the bottom attach back edge of rounded end cap panel to velcro on the side of the Hi-Ref.

**Second:** Starting at the top flex and bend and attach front edge of the end cap to the velcro on the side of the exhibit. Not the front.
