Poised for Growth

- Aquaculture
- Ocean Exploration
- Offshore Renewable Energy
- Marine Pharmaceuticals

Marine Economy Details

The marine economy includes
- Activity occurring in or receiving essential inputs from ocean and coastal waters (e.g., commercial fishing and seafood processing).
- Production of goods and services used in ocean and coastal waters (e.g., ships).
- Activities that, by necessity, are located along the coast (e.g., coastal tourism).

U.S. coastal waters include the oceans, the Gulf of Mexico, and the Great Lakes; estuaries and large embayments such as Chesapeake Bay and Puget Sound; and river segments downstream from seaports such as Portland, Oregon, and Baton Rouge, Louisiana. To access the data, visit https://www.bea.gov/data/special-topics/marine-economy.

Note: The 2020 status is measured by current dollar values; the growth values from 2019 are in chained (2014) dollars that have been adjusted for inflation.
