Subject: Shame on you

Dr Jacobs - shame on you and your staff for politicizing and undermining the science of hurricane forecasting and denigrating the proud scientific tradition of NOAA. You should hang your head in shame for allowing the agency to become yet another pawn - if not weapon - in our deranged "Dear Leader's" inability to distinguish fact from fiction. Is this how you want to be remembered and how you want to remember your career of exemplary service. Such a pity. Such a waste.
