Mr. Jacobs,

Did you sign the statement from NOAA have your approval? Why was it released without any signature?

As a private citizen that lives in the West, I am very concerned about the actions of NOAA in this issue. It is obvious that Trump had his people or he himself used a sharpie to alter the work of the weather service. It was inappropriate and probably illegal as I understand it.

So, please, publicly or privately answer my question. I want to know if your agency wrote this memo because of politically inappropriate pressure being applied to your agency. If we, the citizenry, cannot trust the work of the NOAA...who can we trust?

Regards,

Dianna Jackson
