Subject: Where is your scientific integrity?

Dear Dr. Jacobs.

As a Ph.D. physicist (UC Berkeley 1967), I am appalled that you and your agency, NOAA, was undermine the scientific integrity of the staff of the National Weather Service in order to soothe the ego of the president. Why can't you tell the truth that the president had outdated information and that incorrect information about dangerous storms can have harmful consequences?

Sincerely yours,

Gerald Wick

Berthoud, CO (near all of the NOAA facilities in Boulder)
