**Subject:** Alabama issue

OMG I was just reading online where you or some official at NOAA put out a statement to your staff to go along with what Trump said about the hurricane affecting Alabama. I just can't believe this is happening. How in the heck is NOAA to be trusted if this is your policy. Trump is nothing but a loose cannon and for you to go along with his statement is just unthinkable and in my mind you need to step down as an official at NOAA. This president in my mind is embarrassing to our country and to go along with him is just CRAZY NUTS on your part.
