Subject: Trump's weather report - your complicity

To Mr. Jacobs

I've been reading all about your and NOAA's repulsive behavior this past weekend regarding Trump's weather forecast, built upon total BS.

That you succumbed to this kind of blatant sycophancy tells me that you need to hand in your resignation today. You're totally unfit to be running an organization that I depend on for my life, as a resident of Houston, TX. You know exactly why I'm writing, and if you have the least bit of patriotism in your bones, or can adhere to the will of Americans who refuse to stomach Trump's imbecilic behavior, please start packing.

You and the other people in charge of NOAA can't be counted on to give us a true reading of storms that can and will affect my life.

You work for me and You're Fired.

Most Sincerely,

Rick Gordon
