Subject: Stand by our President

Dear Dr. Jacobs,

You've probably been getting some flack for ignoring science and just backing up President Trump on the whole hurricane heading for Alabama story. Some people talk about you having a lack of integrity. But it takes someone special to do as he's told, no matter the facts. You are that man!

But don't worry, you should be proud. Anyone with integrity can back up the science. But only someone like you would ignore the science and back up our President! You are a special man!

If you have kids, they will certainly be proud of you! And your parents must be proud also! "Neil did as he was told" they'll say.

Perhaps soon you'll be working in the White House, and then eventually, in a Trump hotel! You could be the weather man for the Trump Corporation! Man, what a life that would be.

If you can't work for the Trump Corporation, maybe you could work for Wilbur Ross. He's rich too, so he could pay you to do the weather. And you could say that hurricanes will be wherever he says they'll be. Who needs science for that! Nobody, that's who!

Keep backing up our President, no matter what he says or does!

Congrats on your stardom,

J.R. Daunt
