Subject: Please stop lying. Lives and our country are at stake.

Dr. Jacobs,

Please stop defending President Trump's actions. They are indefensible. You are helping the slide to fascism by prioritizing the president's feelings over the safety and well-being of the American people. I am confident you are placating the president to keep your job, but I doubt you would value that job as much under autocratic rule, where the great leader can do no wrong.

Please retract your comments made only to suit the president's ego, and provide objective factual information instead. That is your job.

Thank you,
Andy Sloan
