Overview

This document guides the Federal Program Officer (FPO) through the steps to create and publish a Competitive Request for Application (RFA). The Competitive RFA is the framework that supports development of the Federal Funding Opportunity (FFO).

Prepare to Create a Competitive RFA

Creation of the RFA is the initial action performed by the Federal Program Officer. To create the RFA, the following information is required:

- **RFA Name** – identified by the Federal Program Officer  
  - Easily identifiable names are preferred  
- **Catalog of Federal Domestic Assistance (CFDA) Number**  
- **Fiscal Year**  
- **Approximate funding amount for the RFA**  
- **Funding amount for the Competition**  
- **Application Due Date**  
- **Anticipated Review Event Start and End Date**  
- **Contact person within the agency/bureau responsible for answering questions related to the RFA**  
- **Name of Program Officer(s) who will process the application**  
  - Identified during the routing phase of RFA creation  
- **Application Package** – forms the applicant must include with the application

**NOTE:** Although the examples in this manual are based on National Oceanic and Atmospheric Administration (NOAA) grants programs, the processes described are applicable (with appropriate modifications) to all bureaus that use the Grants Online system.
Create & Review RFA and Publish FFO Overview (COMP-1)

Start

1. RFA Creator
   - Select the RFA Tab & the Create RFA link
   - Select the option to copy RFA from existing or create new RFA

2. RFA
   - Create via links on RFA Details

3. Addresses, Contacts, Mission Goals, Program Elements, Funding Priorities, Competitions

4. Create Publication
   - No workflow prior to Starting FFO.

5. FFO

6. FFO Routing Slip

7. Initiates FFO Workflow

8. Assigned Program Officer

9. Review FFO

10. Optional Reviewer

11. Review FFO/FRN/Synopsis

12. Grants Specialist

13. Review FFO

14. FALD

15. Clear FFO

16. RFA Publisher

17. Post FFO

Optional

End

“Review Reviewer Instructions” workflow can be started after RFA has Publication Date

“Review Reviewer Instructions” document is automatically created and made available to any Certified FPO in Program Office

Not a separate task in Grants Online

September 30, 2015
Version 4.17

End
Create a Competitive RFA

1. Click the **RFA Tab** located at the top of the webpage.

2. Click the RFA Type (radio button) – Competitive.

3. Click the **Create New from Scratch** radio button.

4. Click the **Create RFA** button and the image displayed on page 10 is visible. Follow the instructions that start on page 10 (Create New from Scratch).

5. As an alternative to Step 3, the user may click the **Create New from Existing** radio button.

6. Click the **Create RFA** button and the image displayed on page 8 is visible. Follow the instructions on page 8 (Create New from Existing) to complete this portion of the process.
Create New from Existing

1. When the user clicks **Create New from Existing** radio button s/he must enter data for at least one of the four fields visible on the screen (RFA Name, Funding Opportunity Number, CFDA Number, or the Fiscal Year).

2. Click the **Search** button. If the user has not entered data associated with an existing Competitive RFA, the system returns the phrase “Nothing Found to Display.”

3. From the list of existing RFAs, click the **Select** link beside the appropriate Competitive RFA.
4. From the Action dropdown menu select View RFA Details and click the Submit button.

5. On the Competitive RFA Details screen, the default RFA Name* is typically “Copy1 of XXXX” – where XXXX is the name of the existing RFA upon which the new RFA is based. To ensure the new RFA is easily identifiable, the user should change the RFA Name. Carefully review and make changes to the other RFA Header Information data elements where appropriate.

6. After updating the RFA Header information, scroll to the bottom of the screen and click the Save button.

7. Instructions for changes to the RFA Supplementary Information components of the RFA Details start on page 11.
Create New from Scratch

When the user selects the option to “Create New from Scratch,” s/he will commence by supplying data for mandatory fields. A red asterisk (*) denotes a mandatory field.

Header Information

1. Enter data for the following fields:
   - RFA Name*
   - Fiscal Year (YYYY)*
   - Anticipated Publication Date (MM/DD/YYYY)*
     **NOTE:** Must be greater than the current date
   - Line Office*
     **NOTE:** Populated based upon the user's assigned Line Office
   - Assigned Program Office*
   - Assigned Program Officer*
   - CFDA Number*
     **NOTE:** Only Catalog for Domestic Assistance (CFDA) numbers associated with the user’s Line Office will display. If the user needs to add a CFDA number not in the list, s/he should contact the Help Desk.
   - Sub Program

2. Click the **Save** button.
Specify Supplementary RFA Information

Upon successfully saving the RFA Header information, the user is prompted to enter additional information associated with the RFA. This supplementary information includes funding amounts, due dates, contact information, and application routing. The data fields are listed below:

RFA Supplementary Information

- Anticipated Funding Amount*
- New Program*
- Anticipated Award Amount (Min and Max)*
- Anticipated Number of Awards (Min and Max)*
- Selected Federal Addresses*
- Selected Federal Contacts*
- Selected Mission Goals*
- Program Elements/Funding Priorities*
- Competitions
Selected Federal Addresses

1. Click the Add/Edit link below the Selected Federal Addresses* header.

2. To search for a Federal Address, specify information for one or more of the fields. Provide data for the minimum number of fields necessary to conduct the search. If the user specifies search criteria for more than one field, s/he is requiring the system to search and match all information entered. Please note, all Grants Online Federal and Grantee addresses that meet the specified criteria will be returned when the search is executed.

3. Click the Search button.
4. To indicate the address s/he wishes to select, the user should click the check box next to the appropriate Program Office’s name and address.

5. Click the Add to RFA button.

6. If the user needs to specify another address, s/he must complete steps 2-5 again.

7. If the user made a mistake and wants to remove an address, click the check box next to the organization’s name and click the Remove from RFA button. The user must repeat steps 2-5 to select a new address.

8. When the user is satisfied with the selected address(es), s/he should click the Done button.
Selected Federal Contacts

1. Click the Add/Edit link under the Selected Federal Contacts* header. The Federal Contact is the staff member the applicant will contact with any questions about the Funding Opportunity.

A minimum of one search criteria must be entered when searching for contacts. The user can search by First Name, Last Name, Org Name, Street, City, State, Zip, Phone or Email. Please note, all Grants Online Federal and Grantee contacts that meet the specified criteria will be returned when the search is executed.

2. Enter the search criteria for the individual and click the Search button.
3. Click the check box next to the name of the person you wish to identify as the Federal Contact.

4. Click the Add to RFA button at the bottom of the screen.
5. If the user needs to add another contact, complete steps 2-4 again. If the user made a mistake and wants to remove a Federal Contact, click the check box next to the person’s name and click the **Remove from RFA** button. The user must complete steps 2-4 to select another Federal Contact.

6. When the user is satisfied with the selected contact(s), s/he should click the **Done** button.

*(If appropriate)*
Selected Mission Goals

1. To specify the Agency’s Mission Goals, click the Add/Edit link beneath the Selected Mission Goals* header.

2. As a part of the RFA definition process, the user must select at least one of the options available for his/her agency. More than one Mission Goal can be selected. However, the user should first check with his/her Program Manager. When the user has specified at least one option, click the Add to RFA button.
3. To remove a Mission Goal associated with the RFA, select the check box next to the item you would like to remove. Click the **Remove from RFA** button. The user must complete steps 1-2 to include another Mission Goal.

4. When satisfied with the Selected Mission Goals, click the **Done** button to return to the previous screen.
Program Elements/Funding Priorities

1. Click the Add/Edit link below the Program Elements/Funding Priorities* header.

2. In the subsequent screen image that displays, Name* is the only mandatory field. Specify information for that field and click the Save button.
NOTE: Although Name is the only mandatory data entry field, the Program Officer may elect to assign a meaningful (and unique) label for each Program Element associated with the RFA. If a label is designated, the label is displayed under the Program Element Funding Priority column (in lieu of the Program Element Name) on several system-generated reports available from the Selection Package details screen.

3. If the user wishes to add another Program Element/Funding Priority, s/he should click the Add New link. Repeat step 2 as many times as is appropriate.

4. When finished entering all Program Element/Funding Priorities, click the Done button.
Competitions

The Competition contains most of the details associated with a competitive RFA. Every competitive RFA in Grants Online must have at least one competition. There may be multiple competitions under one RFA; each competition results in a selection package. Please note that each competition also requires a Review Event (discussed later in this document).

Create a Competition

1. To ensure all data entered thus far is retained, click the Save button at the bottom of the screen.
2. Click the Add New link below the Competitions header. All fields that are listed below and displayed in the screen shot on the next page require data.

The mandatory data entry fields are as follows:

- Competition Name* (defaults to the name of the RFA)
- Fiscal Year*
- Competition Type*
- Assigned Program Office*
- Competition Manager* (i.e., the person who will oversee the Competition and prepare the Selection Package)
3. Click the **Save** button to capture the information entered. If data is not entered for all fields, an error message displays and the user is unable to navigate from that screen until s/he complies with the mandatory data entry.

</tr>
</thead>
</table>

4. When the user clicks the **Save** button on the previous screen, s/he is presented with another screen for data entry. According to convention, the fields and section headers that have a red asterisk (*) are indicative of mandatory data entry. Supply data for the following:

- Selecting Official*
- Anticipated Federal Funding for the Competition* (Min and Max)
- Application Due Date* and Time*
- Anticipated Award Date*

5. When data entry is complete, click the **View Anticipated Competition Schedule** button. The system-calculated application due date and anticipated award date are based on the values entered for the competition. The system-calculated anticipated award date has no bearing on the actual award date.
6. When finished, click the **Close** button to return to the previous screen.

![RFA Header Information](image)

7. The next item on the screen is available to **NOAA users only**. Other agencies have not submitted Review Criteria templates for inclusion in the Grants Online system. The default value for NOAA’s Review Criteria Type* is **Agency Standard**. If the competition is designated for a fellowship program, click the **Fellowship** radio button.

![Review Criteria Information](image)

8. Click the **Guidance** link for information associated with the Review Criteria Type*. The phrase “The competition does not use this criterion” can be included for any non-relevant criterion.

**NOTE:** When setting up the Review Events, the user will be able to modify the standard criteria and/or incorporate additional criteria as necessary. However, the user must adhere to the Agency’s policies – the Review Criteria details will be reviewed by the Department of Commerce’s Federal Assistance Law Division (FALD) and/or a Bureau attorney.
Application Routing

Selection of an Application Routing* method is mandatory for each competition included in the RFA. The routing method determines who processes an application as it is received by the Agency. The user can specify either Workload or State as the routing method. When one routing method is selected, the other routing method is disabled (i.e., there can only be one routing method per RFA). If the incorrect routing method is selected, the user must clear all selections and save the changes. At this point, the user has a clean slate (relative to the routing method) and has the opportunity to specify a new routing method.

1. Select either Workload or State for the routing method.
   a. **Workload:** The user selects one or more individuals to receive the applications submitted for the competition. The applications will be distributed to the selected individuals on a round robin basis – in the order displayed on the Workload routing screen.
   b. **State routing:** Allows the user to create groups by state. The user can identify a single state, or a group of states that comprise a group. The user can stipulate the Program Officer(s) who will receive the applications submitted from the states in that group.

2. When the user has selected a routing type (Workload or State), s/he should click the View/Edit link.

![Application Routing](image)

**NOTE:** Whoever completes the task of approving the Minimum Requirements for an application “owns” the application. That FPO or staff member will also receive assignments to complete the following tasks: Assign Award Number/Recipient; complete the PO Checklist, the Procurement Request (CD-435), and the NEPA Document (NOAA, EDA and NTIA only). As appropriate, the user may reassign ownership (as determined by user role and access rights) of the application and its associated documents.

Upon selecting the Application Routing* method, follow the appropriate series of steps:

- Workload Application Routing ➔ steps 3-6
- State Application Routing ➔ steps 7-15
3. From the list of Available Users, select the name of the person you would like to receive the application; click the double arrowheads that point to the right [>>]. To select more than one person, select the next name and click on the double arrowheads that point to the right. Repeat the process as many times as is necessary. As an alternative, the user can use the CTRL or SHIFT keys to select multiple names.

4. The selected name(s) will now display in the Selected Users to Receive Applications for This Competition column. Remember, if the user identifies more than one individual, the application is routed in a round robin fashion.
5. If a user’s name is selected in error, highlight the name and click the double arrowheads that point to the left [<<]. This action moves a name from the Selected Users to Receive Applications for This Competition column to the Available Users column.

6. When the user has completed his/her selection click the **Save and Return to Main** button. This action will return the user to the Competitive RFA Details screen. If the user clicks the **Cancel** button, the information entered will not be saved and the user will return to the previous screen. If Workload is selected as the routing method, the remaining steps in this section are not available. Advance to step 17.

7. If the user selects State and clicks the **View/Edit** button, the following screen displays. Click the **Add New** link to enter the states that should be included in the first group. It is to the group(s) that is (are) defined and subsequently selected, that the RFA will be routed.

8. The Routing Group Name* is a mandatory field. Specify the states that should be included in a group and the users assigned to that group will receive the application(s) for those states. Identify the Selected States and the Selected Users by moving data from the Available States column and the Available Users column. The double arrowheads that point to the right [>>] add data; the double arrowheads that point to the left [<<] remove data.
9. Click the **Save** button to retain changes and return to the previous section; click the **Cancel** button to exit without saving the data.

10. Applications from states in the Routing Group will go to the Federal Program/Project Officer(s) assigned to that group. The FPO will complete the Minimum Requirements Checklist for the submitted application(s). Each application will be distributed in a round robin method to individuals that comprise the routing group.

    **Warning!**

    Specify all possible states that might submit an application. Applications received from states not included in any group are routed to the Competition Manager.

11. As shown in the screen image below, one Routing Group has been defined. Click the **Edit or Delete** link to make changes to or delete a group.

12. Click the **Add New** link to specify another Routing Group.

13. When the user defines another Routing Group, the states that were specified in the earlier group(s) are not available for inclusion in the new group.

14. Follow steps 7 & 8 to create another Routing Group.
15. After specifying all necessary groups, click the **Save and Return to Main** button.

16. When the user returns to the Competition Details screen, if s/he used State Application Routing (steps 7-15) the Workload option is disabled.

17. When the user returns to the Competition Details screen, if s/he used Workload Application Routing (steps 3-6) the State option is disabled.
Application Package

Using the steps detailed in this section, the user specifies the type(s) of forms the applicant must submit as part of his/her application package. If the user requires an additional form that is not among the available Grants Online templates, s/he should contact the Help Desk.

1. Scroll down the screen to the Application Package* header. Click the View/Edit link.

2. Select a Form Family* from the 1st dropdown menu. Currently only the SF-424 Form Family has associated templates.

3. Select a Template* from the 2nd dropdown menu. Legacy templates are inactive and will produce an error message.
4. When the user selects the appropriate options, a list of the mandatory forms and the optional forms is visible at the bottom of the screen.

NOTE:

5. Click the Save button at the bottom of the screen. The Save was Successful message confirms a Form Family and a Template have been associated with the RFA.

NOTE: When an Application Package is submitted via Grants.gov, there isn’t a check to ensure the optional forms have been included with the application. Without the optional forms, an application is incomplete and will not pass the Minimum Requirements evaluation.
6. Reference the note at the bottom of the screen, “For Universal RFAs, you may attach Application Instructions to the RFA……”

For a **Competitive RFA**, the user **should not include attachments (Application Instructions)**. The Federal Funding Opportunity (FFO), discussed later in this manual, serves as the Application Instructions for a Competitive RFA.

**NOTES:**

- Nearly all non-construction funding opportunities have a standard Application Package consisting of: SF-424, SF-424A, SF-424B and CD-511.
- For a construction package, the SF-424C and SF-424D would be used in lieu of SF-424A and SF-424B.
- The SF-LLL is an optional form. However, certain applicants must include this form with the Application Package.
- A standard Application Package includes project narrative and budget narrative files. These are not forms; they are whatever type of document the applicant wishes to upload.
- If a relevant (necessary) form is not included among the available Grants Online templates, please contact the Help Desk for assistance.

7. Click the **Save and Return to Main** button.
Minimum Requirements

A standard set of Minimum Requirements is automatically defined. The system default Minimum Requirements can be modified or deleted for each competition. The FPO identifies the initial requirements each application must meet to merit further consideration for funding under a competition.

1. Before the user clicks any of the hyperlinks, click the Save button at the bottom of the screen.

2. Click the View/Edit link below the Minimum Requirements* header.

3. To view or edit a requirement, click the Edit link.

4. To delete a requirement, click the Delete link.

5. To add a new requirement, click the Add New link.
6. Enter the Requirement Name*.
7. Enter the Requirement Description*.
8. Click the Save button to add a Minimum Requirement to the list. The user may click the Cancel button to go back to the previous page; changes made on the page will not be saved.

9. The system returns to the Selected Minimum Requirements page, where the user can add a new requirement (use the Add New link), reorder existing requirements (use the Reorder link), or click the Done button to continue working on the RFA.
10. When the user clicks the **Done** button, the system returns to the Competition RFA Details screen.
Special Award Conditions

This section provides instructions to create the Special Award Conditions (SAC); SACs are optional. When the user associates a SAC with a RFA, s/he should be cognizant that the SAC will be applied to every application that is processed using that RFA. After the RFA is published, the SAC can only be disassociated from the RFA with assistance from the Help Desk.

If the RFA does not require a SAC, advance to page 37.

1. To specify the Special Award Conditions, click the View/Edit link beneath the Special Award Conditions header.

2. Click the Create from Scratch link.

3. Enter the Name*.

4. Enter the Description*.
5. Click the **Save** button to capture the changes and remain on this screen. If this option is selected, the user will also have to complete step 6 to return to the previous screen.

6. Click the **Done** button to capture the changes and return to the previous screen.

7. Click the **Cancel** button to leave the screen without saving any changes.

8. When the user completes steps 5 & 6 or step 6, there is now a Special Award Condition established for this Competition. If the user would like to edit the SAC, click the **Edit** link. If s/he wants to delete the SAC, click the **Delete** link. Finally, if the user selects the **Template** link, s/he is presented with a copy of an existing template that can be used for a new SAC based upon the same competition. The user should modify the Name and Description of the new SAC.

9. The user can specify additional Special Award Conditions. To do so, repeat steps 2-6 as many times as is appropriate. If the user clicks the link under the **Name** column header a “View Only” version of the SAC is visible. In this example, the link is entitled **Special Award Conditions**.

10. When the final SAC is created, click the **Done** button to return to the previous screen and continue creating the RFA.
Review Events

The Review Events task can occur either using the Grants Online system or outside Grants Online. The steps that follow describe, at a high level, the creation of a Review Event. For an in-depth discussion, please refer to item #15 on the PMO website: Grants Online Guidance – Creating a Review Event. http://www.corporateservices.noaa.gov/grantsonline/Documents/Quick%20Reference%20Guides/Creating_a_Review_Event.pdf.

1. Click the Add New link beneath the Review Events header.

2. When presented with the screen below, note that Review Event Name* and Review Basis* are mandatory fields.

3. Enter information for the Review Event Name.

4. From the dropdown menu, select the Review Basis.

5. Click the Save button. This opens the Review Event Details page.
6. All fields displayed on the Review Event Details page in the image below require data.

- Review Event Manager*
- Review Done By* - Choose one of the two radio buttons.
- Scored Criteria* - Choose one of the four radio buttons.
- Summary Score Determination* - The default radio button for is N/A. Either Mean or Median must be specified if the Scored Criteria is Quantitative.
- Not Scored Criteria* - The default radio button is No; modify if appropriate.
- Bonus Points* - The default radio button is No; modify if appropriate.
- Anticipated Review Start Date* - The value entered cannot precede the Application Due Date.
- Anticipated Review End Date*.

7. When finished with data entry, click the Save button to capture the data; click the Save and Return to Main button to save data and return to the previous screen; or click the Cancel button to exit without saving changes.
Federal Funding Opportunity (FFO)

Each Competitive RFA requires the creation of a Federal Funding Opportunity (FFO). The FFO is posted on Grants.gov and instructs applicants how to respond to the RFA. It is imperative that the FFO is 100% accurate. To that end, the Federal Assistance Law Division (FALD) or a Bureau attorney reviews documents prior to publication on Grants.gov. This review ensures the FFO is legally sound and meets all applicable Federal and Departmental requirements.

1. The NOAA user is required to create his/her FFO using the Grants Online system. Prior to creating the Federal Funding Opportunity, the user must provide data for all mandatory fields on the RFA Details page.

2. Users in agencies who have developed their FFO outside of Grants Online can attach the document to the FFO launch page. Click the Attachments link and follow the instructions. When the FFO is created outside of Grants Online, the user should skip to the next section which starts on page 45.

3. Select the Create the Federal Funding Opportunity from the Action dropdown menu. Click the Submit button and the image shown at the top of the next page is visible.
4. The top portion of the FFO screen is visible in the image below. The user will need to use the scroll bar to see all FFO data elements. Click the Guidance Documents link.

5. A portion of the information contained on the Guidance Documents screen is visible below.

6. Following the Document Creation Assistance text there are hyperlinks that provide detailed information for each data entry field.
7. The following information is provided for each FFO hyperlink:

- FFO Field Name
- FFO Field Location (i.e., the section on the FFO and the field number). The hyperlinks on each data element’s screen can be used to navigate to the preceding field or the subsequent field.
- OMB Guidance
- Additional Guidance
- Published Examples

**NOTE:** A screen shot of the “Program Objective” (FFO Field Name) is displayed below.

<table>
<thead>
<tr>
<th>FFO Field: Program Objective</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>FFO Location:</strong> Funding Opportunity Description - first field</td>
</tr>
<tr>
<td>- Preceding Field: Funding Opportunity Description</td>
</tr>
<tr>
<td>- Subsequent Field: Program Priorities</td>
</tr>
</tbody>
</table>

**OMB Guidance:**
- I. Funding Opportunity Description — Required
  - This section contains the full programmatic description of the funding opportunity. It may be as long as needed to adequately communicate to potential applicants the areas in which funding may be provided. It describes the agency’s funding priorities or the technical or focus areas in which the agency intends to provide assistance. As appropriate, it may include any program history (e.g., whether this is a new program or a new or changed area of program emphasis). This section may communicate indicators of successful projects (e.g., if the program encourages collaborative efforts) and may include examples of projects that have been funded previously. This section also may include other information the agency deems necessary, such as citations for authorizing statutes and regulations for the funding opportunity.

**Additional Guidance:**
- Do not enter the field name (shown in bold in the examples). The FFO generator will enter the field name.
- The Department has broken this required section into 4 required subsections. Program Objectives is the first of these.

**Published Examples:**

- A. Program Objective:
  - Pursuant to the Coral Reef Conservation Act of 2000 (Act), the Secretary of Commerce (Secretary), through the NOAA Administrator (Administrator), and subject to the availability of funds, is authorized to provide matching grants of financial assistance for coral reef conservation projects through the Coral Reef Conservation Program (Program). As such, the objective of the Program is to provide financial assistance for coral reef conservation projects consistent with the Act and “A National Coral Reef Action Strategy” (Strategy). A copy of the Strategy and the Act can be found at: [http://www.coralreef.noaa.gov/](http://www.coralreef.noaa.gov/).

**NOTE:** For convenience, the user can cut and paste text from a prior year’s Program Objective. To prevent formatting problems in the new FFO, the original document should be converted to plain text before using the copy and paste functions. The content can be modified to address the requirements of the new RFA.
8. Focusing on the Full Text of Announcement section of the FFO in the Grants Online system, the screen below is visible. Click each hyperlink and enter data. Although not enforced by the system, FALD will not clear the FFO unless each hyperlink category has been adequately addressed. The requirement that each field in the Full Text of Announcement be addressed also applies to the FFO developed outside of Grants Online.

9. After entering data for each field, click the **Save** button at the bottom of the data entry screen.
10. As data is provided for each field and the user clicks the Save button the word *(empty)* is replaced with a green check mark (✔️) next to the field name (data element).

![Image of Executive Summary with data fields and save button](image)

11. The **Save button at the bottom of the page** below saves data in the Executive Summary section of the FFO. Recall, each data field has its own Save button. The **Cancel** button will take the user from the FFO details screen to the FFO launch page without starting the workflow.

![Image of FFO Routing Slip and Start Workflow](image)

**NOTE:** The **View FFO Report** button at the bottom of the screen can be used at any time to generate a copy of the FFO in its current state. If applicable, to view a copy of the FRN, click the **View FRN Report** button.
Specify an Optional Reviewer

When the user has entered data for all mandatory fields and any relevant optional fields, review and verify the accuracy of the information entered on the Competitive RFA Details page.

1. When satisfied that information is complete and accurate and the RFA is ready for publication/posting, click the **FFO Routing Slip and Start Workflow** button to proceed to the next step.

2. The Routing Slip is visible in the screen shot below. If appropriate, the user can add one or more Optional Reviewers. If not, advance to step 7.
NOTES: The Optional Reviewer is the only customizable portion of the FFO Routing slip. The Assigned Program Officer is copied from the RFA details. The Grants Specialist is based upon the user’s Line Office and CFDA Number.

When the FFO goes to FALD and to the RFA Publisher, all users with those roles in the user's agency will receive a task. The first user to take an action on the task will become the owner. The task will be cleared from the Inbox of other users to whom the task was sent.

After the FFO routing slip has been finalized and the workflow starts, the routing slip can only be modified by the Grants Online Help Desk. The user may also return the FFO to the Program Officer (or Grants Specialist) for modifications.

3. Click the **Add Optional Reviewer** button.

4. To locate an optional reviewer, enter one or more items for the search criteria. If the user specifies search criteria for more than one field, the system will attempt to match all criteria specified. To improve the chances for a match, use a broader (fewer items) search criteria.
5. The search returns a list of reviewers that match the specified search criteria. Click the Select link next to the person’s name to include that person as an Optional Reviewer.

6. The designated Optional Reviewer’s name is shown on the routing slip under the Optional Reviewer header. Repeat steps 3-5 as many times as is necessary to identify additional Optional Reviewers.

   In this example, we have specified one Optional Reviewer. Remember, if more than one Optional Reviewer is specified, each reviewer must approve the RFA.

7. After the Assigned Program Officer, and if indicated the Optional Reviewer(s), has verified the RFA is ready for posting, select Initiate Application Package Posting from the Action dropdown menu and click the Submit button.
8. Click the **Save Route** button at the bottom of the screen.

9. Click the **Start Workflow** button at the bottom of the screen.

10. A warning message indicates the user is about to start the Workflow process. After the user clicks the OK button, s/he will not be able to modify the Routing Slip. Click the **OK** button to proceed.
11. The FFO Header page is shown below. The Funding Opportunity Number (FON) uniquely identifies the RFA. The FON can be used to search for and retrieve the RFA and its associated documents. Note, at this point the RFA has not been published.

![FFO Header page screenshot]

12. The Assigned Program Officer will click the **Workflow History** button to notify the Grants Specialist that s/he has a task to approve the Application Package.

![Workflow History button screenshot]

13. From the resulting screen, click the name of the person to whom the task should be sent (see the column with the **Performer** header).

![Workflow History table screenshot]
14. Compose the message and click the **Send** button.

![Send Message](image)

15. The Grants Specialist will log on to his/her account and view the task awaiting action. S/he should review the FFO to confirm all necessary information is included and accurate. From the Action dropdown menu, select **Approve** and click the **Submit** button.

![Federal Funding Opportunity](image)

16. The Assigned Program Officer will click the **Workflow History** button to notify the Federal Assistance Law Division (FALD) that there is a FFO ready for its review and approval.

![Federal Funding Opportunity](image)
17. From the resulting screen, click the name of the person to whom the task should be sent (see the column with the **Performer** header).

18. When satisfied that all components of the RFA are complete, FALD will approve the FFO. From the Action dropdown menu, select **Clear FFO** and click the **Submit** button.
Publish a Competitive RFA (Post the FFO to Grants.gov)

1. When satisfied all required information is included, the RFA Publisher should select Publish FFO from the Action dropdown menu and click the Submit button.

2. Summarizing the steps completed thus far, the Workflow History for the RFA is shown below.

3. Summarizing the steps completed thus far, the Workflow History for the FFO is visible below.
