Subject: Fwd: Current ROC baseline draft

Naseem.

FYI...this is the FWS draft baseline section. I meant to share earlier. There are probably some good things in here that we could use. Also, please look at the WOS language just so you know what they are saying. Kudos to you and Brian that they borrowed some of our language!

<garwin.yip@noaa.gov>

Our current draft is attached. This includes status and baseline because we are mushing the two together because ROC overlaps the entire range of delta smelt. The "without action" part is near the end. This is has not received any sort of review and comment outside of our office, so it is subject to change.
