Thanks! Can I trouble you for similar data for Knights Landing? I am noticing the species distribution in environmental baseline needs updated citations and evaluation of updated monitoring data, so doing a quick check.

Here's a quick graph of relative monthly abundance of winter run sized fish at Chipps over last 8 years: (x axis is months, y is counts)

On Wed, May 1, 2019 at 5:13 PM Barbara Byrne - NOAA Federal <barbara.byrne@noaa.gov> wrote:

- DJFMP data, including Chipps, available at: https://www.fws.gov/lodi/juvenile_fish_monitoring_program/jfmp_index.htm; current 2012-2019 spreadsheet posted on that website (uploaded 4/17/19) is attached.
- You can query data from various monitoring sites, including Chipps, at SacPAS -- see, e.g. http://www.cbr.washington.edu/sacramento/tmp/hrt_1556752562_269.html
- Hottest off the press DJFMP data, including Chipps, available at: <https://dev.baydeltalive.com/fisheries/djfmp-highlights> -- use the "DJFMP catch snapshot" query tool at the bottom of the page; enter "Chipps CHN Winter" in the search box to see only WR catch at Chipps in your specified date range.

Hi Jeff and Barb,

Do you have recent MWT data at Chipps Island you can share with me? Looking specifically for winter run sized fish. I'm okay if you just send me the spreadsheets.

Thanks!

Rosalie
